

2016 Colorado State EMS Conference Recommendations for Continuing Education Allocation by Session

This document is created by the Colorado EMTS Professional Standards Section to provide suggestions for allocation of continuing education (CE) based on this year's current conference schedule. Please confirm with your local state-recognized education program or the National Registry that you have the necessary CE hours and credits towards Colorado and/or NREMT recertification requirements. The numbers in parenthesis in the tables on the left indicate the minimum number of CE hours required in each category. Sessions listed in multiple categories can be divided between the categories or applied to a single category.

See the [2016 Colorado State EMS Conference Recommendations for Continuing Education](#) booklet to determine the contact hours for individual
