2017 Registration Brochure

45th Anniversary

Colorado State EMS Conference
Keystone, Colorado | November 2-5, 2017
We hope you will join us this year at the 45th Anniversary of the Colorado State EMS Conference. This conference continues to build on its impressive tradition of superb EMS education in the beautiful Rocky Mountains. Break away and enjoy some time with your colleagues at the Keystone Resort & Conference Center in Keystone, Colorado. The Emergency Medical Services Association of Colorado (EMSAC) is proud to bring you Colorado’s foremost EMS educational event. We look forward to seeing you there!

EDUCATION
At the 2017 Conference, our profession’s premier EMS educators from within Colorado and across the nation will bring you the greatest variety of courses ever offered. The schedule of pre-conference workshops and conference topics offer many choices of programs for your selection.

MOTIVATION
Keeping informed about the evolution of EMS into the future...
Learning from the nation’s foremost educators...
Meeting other EMS professionals...
Enhancing your profession...
Improving patient care...
Perfecting skills...

SUCCESS
Plan now to attend the 2017 Colorado State EMS Conference. Combine your professional and personal goals and the finest in EMS education during a refreshing late-fall in Keystone. You will learn techniques and information to improve yourself, your patient care, your EMS agency and your state’s EMS delivery system. With the region’s largest exhibition of EMS products and service suppliers, this event will be Colorado’s EMS highlight of 2017. Don’t miss this chance to meet some of the finest in the EMS profession: your colleagues. More than just an annual conference, the 2017 Colorado State EMS Conference, where Education + Motivation = Success, will continue to be the standard by which other state EMS conferences are measured.

Scott Sholes
EMSAC President
DJ Head

Three Ways to Register

Register online at: www.emsac.org

Mail registration to:
Colorado State EMS Conference
PO Box 3406
Englewood, CO 80155

Fax registration to: 303-200-7099

Please print legibly or type all information on the registration form. Submit only one registrant per form; the form may be photocopied for additional registrations. Early-Bird fees are available for registrations received on or before Friday, October 20, 2017.

Registrations will not be accepted without accompanying payment. You may register with VISA, MasterCard, American Express, or Discover or send with check payable to “Colorado State EMS Conference.” A facility Purchase order may be accepted as a guarantee of payment however, **full payment must be received prior to the Conference.** CE transcripts will not be provided until payment is made in full.

DO NOT MAIL registrations after Monday, October 16, 2017. You will need to register at the conference after this date. Please note that lunch may not be provided for registrations received after Friday, October 20, 2017.

For questions about registration, contact the Colorado State EMS Conference Office at 303-317-6511 or 800-889-5690, or email to conference@emsac.org.

**EARLY BIRD DISCOUNT**

Save up to $30 on full conference fees by registering early! Conference registration fees will increase after Friday, October 20, 2017.

**REGISTRATION OPTIONS**

**Full-Conference Registration**
Friday, November 3 through Sunday, November 5

Full registration includes admission to general sessions, education sessions and exhibit hall. This option also includes continental breakfast on Friday, Saturday and Sunday; lunch on Friday and Saturday and a reception on Friday.

**One-Day Registration**
Friday, Saturday or Sunday

Friday registration includes admission to the general session, education sessions and exhibit hall, continental breakfast, lunch and reception.

Saturday registration includes admission to the education sessions and exhibit hall, continental breakfast, lunch and reception.

Sunday registration includes admission to education sessions and continental breakfast.

**PRE-CONFERENCE WORKSHOPS**

Thursday, November 2, 2017

The pre-conference workshops offer something for everyone! Join us for these cost-effective, educationally intensive programs. These courses have a low student-to-instructor ratio that will ensure your specific educational goals are met. The workshop instructors will delve into the topics and provide more interaction than in a typical class.

A separate registration fee is required for each workshop; fee includes admission to the class, educational materials, refreshments and lunch.

**MEAL FUNCTIONS**

Complimentary continental breakfast will be served each morning of the conference from 7:30 am to 8:00 am. Lunch will be provided for Conference attendees on Friday, November 3 and Saturday, November 4. Due to logistics and catering requirements, lunch is not guaranteed for on-site registrations.

**SESSION RSVP**

Please help us to ensure session availability and appropriate seating by indicating your preferred sessions on the Conference Registration form. Select only one class per time period. RSVPs will be accepted in the order in which registrations are received. Class sizes are limited and seating is not guaranteed.

**DISCOUNTS AND BENEFITS**

Discounts and benefits include the First-on-Scene party Thursday night and chances to win special EMSAC prizes. For more information about EMSAC, please visit www.emsac.org.

**REGISTRATION/CONFIRMATION**

All registrants will be sent a registration confirmation prior to the conference via email.

**SESSION HANDBOVTS**

All materials received from the speakers prior to the conference will be posted on the EMSAC website at www.emsac.org. No printed handout materials will be distributed for education sessions.

**CE INFORMATION**

Conference sessions may be approved for continuing education credit by Colorado State Recognized Education Centers or CE Education Groups. Please visit the EMSAC website at www.emsac.org for recommended CE hours and suggested recertification categories. Most conference sessions will meet recertification requirements for the National Registry of EMTs. To determine if a particular session meets these requirements, you must first be familiar with the recertification requirements and objectives for your level of certification, then compare the session description to those requirements and objectives.

For information about NREMT recertification, please contact NREMT or visit their website at www.nremit.org

**REGISTRATION DESK**

The Conference Registration Desk will be located on the first floor of the Keystone Conference Center. Please stop by when you arrive at Keystone to pick-up your official conference name badge, schedule and other pertinent materials.

**Thursday, November 2, 2017**
7:00 am to 5:00 pm

**Friday, November 3, 2017**
7:00 am to 5:00 pm

**Saturday, November 4, 2017**
7:00 am to 5:00 pm

**Sunday, November 5, 2017**
7:30 am to 12:00 noon
CANCELLATIONS/REFUNDS
All cancellations and requests for refunds must be submitted in writing to:
Colorado State EMS Conference
PO Box 3406
Englewood, CO 80155
or by fax 303-200-7099
Requests received on or before October 20, 2017, will be entitled to a full refund less a $30 processing fee. After October 20, 2017 and before October 31, 2017, the registrant will receive a credit certificate valid for use at the 2018 Colorado State EMS Conference. If for any reason the conference is not held in 2018, the certificate shall become null and void or reissued for a future conference or event. There are no refunds or credits for cancellations after October 31, 2017 or for no-shows.

ACCOMMODATIONS
Keystone Resort & Conference Center
U.S. Highway 6
Keystone, Colorado 80435
Reservations 800.258.0437
970.496.4240 / fax 970.496.4543
www.keystoneconferences.com

Keystone Resort is a spectacular setting amidst aspen and pine trees making it truly unique and a world away from the distractions you’ve left behind. Keystone Resort has the largest and most versatile meeting facilities in Colorado’s Rocky Mountains, which are complimented by exceptional accommodations. Keystone Resort offers a variety of accommodation options at discounted group rates for EMS Conference attendees.

The Inn at Keystone
$99 per night, single/double occupancy* There is a $10 per night Resort Fee for the Inn at Keystone.

The Keystone Lodge
$135 per night, single/double occupancy* There is a $10 per night Resort Fee for The Keystone Lodge reservations.

Conference Village Studio
$135 per night, single/double occupancy*  
Conference Village One-Bedroom Unit
$145 per night, single/double occupancy*  
Conference Village Two-Bedroom Unit
$190 per night, single/double occupancy*  

*A $10 resort fee will be charged above and beyond the housing rates listed above.

*Rooms are subject to applicable state and local taxes in addition to a 5.9% resort surcharge. If your organization has tax exempt status, you must notify the hotel at the time of reservation and present a tax exempt certificate upon check-in. The 5.9% resort surcharge is applicable for all reservations regardless of tax exempt status.

If your organization qualifies for sales tax exemption, the proper documentation is REQUIRED prior to or at the time of check-in, or Keystone Resort will apply tax to your lodging charges. Each additional adult occupying the same unit will be charged $20 per night. Children 18 and under stay free when accompanied by parent or guardian. Maximum occupancy may not be exceeded and additional beds will not be furnished. For Reservations, call 800.258.0437

Group Discount Code: CK2EM7

Group rates will be honored for reservations made on or before Sunday, September 17, 2017. Lodging is limited and available on a first-come, first-served basis. A deposit equal to the first night’s lodging plus tax and surcharge in the form of check or credit card must accompany reservation. Check-in time is after 4:00 p.m.; guests may check-in earlier based on availability. Check-out time is before 11:00 a.m.

DIRECTIONS TO KEYSTONE
From Interstate 70 take Silverthorne/ Dillon exit 205. Go under the overpass onto Highway 6. Proceed approximately seven (7) miles to Keystone properties.

TRANSPORTATION OPTIONS TO KEYSTONE
Keystone Resort spans seven miles along the Snake River and is the closest destination resort to DIA (Denver International Airport). The Keystone Conference Center sits roughly in the center of the resort. Many restaurants, shops, accommodations, and activities are within walking distance of the Conference Center. Navigating the full expanse of the resort is simple with the complimentary intra-resort shuttle system. Once you check-in, there is no need for a car. Resort shuttle is provided through a combination of scheduled routes that serve Keystone Lodge, Conference Center Village, River Run Village, Keystone Mountain and on-call (EASE) Extended Area Service buses that serve outlying resort areas not located on a scheduled route. Keystone is easily accessible via three Colorado airports:

• Denver International Airport is 90 miles east of Keystone via Interstate 70. DIA is a nonstop destination for over 21 national and international carriers.

• Vail/Eagle County Airport is 65 miles west of Keystone.

• Colorado Springs Municipal Airport is 109 miles from Keystone.

DIA AIRPORT SHUTTLE
Getting to Keystone is easy via the door-to-door shuttle service of CME (Colorado Mountain Express). Numerous daily door-to-door shuttles run to and from Denver International Airport and your favorite Colorado resorts. For current rates, schedules and reservations, go to Colorado Mountain Express www.ridecme.com or call 800.525.6363.

BUS
Greyhound Bus Service offers transportation to Summit County, Colorado. Once you arrive at the Greyhound transfer station in Frisco, Colorado, it is necessary to take the free Summit Stage to complete the journey into Keystone. Greyhound: www.greyhoundbus.com

CAR RENTAL
Hertz, The Official Car Rental Company of Vail Resorts, and most major car rental companies are available at the Denver International Airport, Vail/Eagle County Airport and Colorado Springs Municipal Airport. Visit www.hertz.com

TRANSPORTATION to Summit County is available from 2:00 pm to 2:00 am daily. Rainbow Taxi can be reached at 970.453.TAXI.

LOCAL TRANSPORTATION
For traveling throughout Summit County, free transportation is provided by Summit Stage. More information is available at www.summitstage.com or 970.668.0999. Taxi service throughout Summit County is available from 2:00 pm to 2:00 am daily. Rainbow Taxi can be reached at 970.453.TAXI.

Registration and attendance at, or participation in, the Colorado State EMS Conference and other activities constitutes an agreement by the registrant to the Colorado State EMS Conference’s use and distribution of the registrant or attendee’s image or voice in photographs, videotapes, electronic reproductions and audiotapes of such events and activities.

NEW FOR 2017

NEW – EMS PHYSICIAN’S FORUM
Friday, November 3, 2017

Special K – Does Ketamine Have a Place in a Balanced EMS Diet? A discussion of EMS pain sedation and management of the agitated patient in the prehospital setting.

The EMS Physician’s Forum is a new program offered during the Colorado State EMS Conference. This forum is specifically tailored for EMS physicians with brief presentations and interactive discussions. Content will include trauma, pediatric EMS issues, and high-risk patients.

Discussions will be led by Dr. Jeff Beckman, Dr. Kevin McVaney, Dr. Lara Rappaport and other Colorado EMS physicians.

This forum will provide five (5) CME credits sponsored by Denver Health.

7:30 am - 8:00 am Continental Breakfast – Conference Center
8:30 am - 10:00 am Conference Keynote Session – Conference Center
10:00 am - 12:30 pm Physician’s Forum – Keystone Lodge
12:00 pm - 1:30 pm Lunch – Conference Center
1:30 pm - 3:00 pm Physician’s Forum Continues – Keystone Lodge

Registration fee: $175 NOTE: This session is only open to physicians.

To register utilize the registration form in the back of this brochure or on the EMSAC website (emsac.org).

GET CERTIFIED AT THE 45TH ANNUAL COLORADO EMS CONFERENCE!
November 2, 2017
6:00 PM | Keystone Lodge | Keystone, Colorado

Exams offered on Thursday, November 2nd, 2017 at the Colorado State EMS Conference Specialty Certification is a voluntary credentialing process designed to validate essential knowledge and judgment required for safe and competent practice. The IBSC/BCCTPC credentials provide designations for paramedic professionals who demonstrate knowledge, experience and excellence as a specialty paramedic. The FP-C & CCP-C exams are based upon the critical care paramedic transport standards and practice. The TP-C® and TR-C® exams are based on the 10 critical competency domains published in 2016 by the National TEMS Initiative and Council (NTIC), the clinical guidelines developed by the Committee for Tactical Emergency Casualty Care (C-TECC) and the Committee on Tactical Combat Casualty Care (CoTCCC) for the civilian and military communities respectively. The CP-C exam reflects the wide-range of community Paramedic practice by certified emergency medical service providers who provide community-based, out-of-hospital medical services to medically under served and medically served, yet vulnerable, populations.

ELIGIBILITY
• Certification as a Paramedic-Critical Care (P-CC) can be issued based on either CCP-C or FP-C certification by the IBSC/BCCTPC
• Paramedic level provider exam candidates must hold a current unrestricted Paramedic license
• TR-C candidates must have proof of a tactical medical role on a tactical team
• Three years of experience in area of specialty is encouraged.

FEES
• FP-C & CCP-C & CP-C Paper/Pencil - $325 ($225 for IAFCPC members)
• TP-C & TR-C Paper/Pencil - $325 ($225 for SOMA members)

For additional information and to register visit www.IBSCertifications.org or call (770) 978-4400
Note: separate registration required
Jeff Is A World Renowned....
Adventurer / Expedition Leader / Speaker / Facilitator / TV Personality
Physician Assistant / High Altitude Medic

As a highly sought after speaker/facilitator with over 20 years delivering engaging and impactful keynotes to hundreds of clients, Jeff has made appearances at dozens of Fortune 500 companies around the world. Jeff takes the audience on a journey to high peaks around the globe, detailing his exciting endeavors as mountain guide, adventurer and philanthropist. These experiences have allowed Jeff to hone his skills of servant leadership, teamwork, communication and handling adversity which he shares in a way that is applicable to everyone in their business and personal lives.
PCAD1
EMS Leadership Summit - 10 Essential Conversations
Aarron Reinert
(Full-Day 8:00 AM - 5:00 PM)
Great EMS organizations are the product of great leaders. This summit is built on the principles of the acclaimed EMS Leadership Academy and connects today’s challenges with your practice of leadership. Get inspired, refreshed, challenged, and sharpened!

PCAD2
Pre Conference Cadaver Lab
Kevin McVaney, MD
(Full-Day 8:00 AM - 5:00 PM)
Don’t miss this opportunity to participate in a cadaver dissection led by a team of awesome, EMS-friendly physicians who love to teach. View the dissection of the cadaver and discuss the most common penetrating and blunt injuries to the internal organs.
NOTE: Limited to the first 25 attendees.

PCAD3
Critical Care Review Pre-Conference
Reuben Farnsworth
(Full-Day 8:00 AM - 5:00 PM)
This 8 hour pre-conference session will provide 8 hours of critical care CE. Topics include lab values, airway, cardiology, and advanced assessment. Come prepared to expand your critical thinking and improve your critical care medicine skills.

PCAD4
Advanced Winter Driving for First Responders with Hands-on Training
Michal Michalkow
(Full-Day 8:00 AM - 5:00 PM)
Advanced winter driving skills for First Responders including skid control, recovery, and avoidance will be presented. Other topics include: stressful handling of the vehicle, mental handling (how you make decisions), and vehicle dynamics (how you manage them).

PCAD5
Mental Health First Aid
Melody Mesmer
(Full-Day 8:00 AM - 5:00 PM)
The 8 hour class will certify the provider in Mental Health First Aid. This class will cover the dynamics of community mental health issues, recognition of mental health disorders and appropriate interaction with the individuals in our community. This class will be tailored to the first responder.

PCAD6
ALS Refresher Core Content Workshop
Paul Werfel
(Full-Day 8:00 AM - 5:00 PM)
The ALS refresher workshop will focus on 15 of the 24 hours of mandatory core content required by the National Registry of EMTs to meet the objectives of The DOT Advanced Refresher. Attendance at this pre-conference will assist in completing DOT Advanced Refresher requirements over a 2 year period.
Note: 2-day course. Must attend both days to get credit.

* Indicates repeated or continued sessions
PCAD6 (CONTINUED)
ALS Refresher Core Content Workshop*
Jonathan Politis  
(Full Day 8:00 AM - 5:15 PM)
The ALS refresher workshop will focus on 15 of the 24 hours of mandatory core content required by the National Registry of EMTs to meet the objectives of The DOT Advanced Refresher. Attendance at this pre-conference will assist in completing DOT Advanced Refresher requirements over a two-year period.
Note: 2-day course. Must attend both days to get credit.

SESSION 1
Misses and Mimics: ECG Signs of Myocardial Ischemia
Dylan Luyten, MD
Hone your skills with ECG. Using an engaging case-based format, this presentation will review classic misses as well as classic mimics of myocardial infarction.

SESSION 2*
Cadaver Lab Abdominal  
Sue Slone, MD
A visual tour through the abdominal cavity will review the external anatomy and internal structures including the stomach, liver, large and small intestines, and other solid and hollow organs.
NOTE: This session is limited to 25. Space is limited; please register early.

SESSION 3
Doing the Right Thing is Always Easier
Michael D. Smith
The headlines are filled with stories of alleged wrong doings by first responders. This lecture will cover ethical dilemmas faced by all first responders. We will discuss laws and how they pertain to EMS. It’s always easier to do the right thing for your patients’ best interest. We will cover confusing situations like DNR’s, field termination, treatment and release and refusals.

SESSION 4
Interpersonal Violence: Domestic Violence, Sexual Assault, and Strangulation for EMS
Michelle Metz
IPV, Interpersonal Violence, is a public health issue that is frequently encountered by EMS providers. This presentation will provide an overview of both domestic violence and sexual assault; providing the participant a strategy to provide appropriate care for these patients.

SESSION 5
The EMS Skeptic’s Guide to Alternative Medicine: Helpful, Harmful or Hoax?
Brian Behn
EMS providers often encounter patients that embrace complimentary medical practices and occasionally must interact with practitioners from these fields. This presentation will be sure to generate discussion, presenting a no-holds-barred review of the evidence for and against alternative medicine.

SESSION 6
Deep Dive into Empathy vs. Sympathy for Our Co-Workers and Our Profession
Timothy Neaderhiser
Why are we so mean to each other? The first part of the session will differentiate empathy and sympathy and activities that elicit deep interpersonal responses. In the second half of the session the instructor will lead a group discussion on EMS culture and treatment of peers.

10:30 AM - 12:00 PM
Hands-On Skills
St. Anthony Pre-Hospital
ALS/BLS
This session will be conducted by instructors from St. Anthony Pre-Hospital Services. Sim-Man and other human patient simulators will be utilized to provide scenario based training in this hands-on skills lab. The goal will be to expose the participant to best practices in the management of high-acuity, low-volume patients and improve his/her comfort level in providing care to these patients.

1:30 PM - 2:30 PM
Hands-On Skills
Flight For Life Colorado
ALS/BLS Airway Lab
Join the crews of Flight For Life Colorado for this hands-on, interactive ALS/BLS airway lab. This lab provides ample opportunity for the provider to practice good technique in airway control. Best practices in surgical cricothyrotromy, intubation, NPA/OPA, supraglottic airway(s), and BVM ventilation will be covered.

* Indicates repeated or continued sessions
SESSION 7
Willy Wonka and the Ketamine Factory
Cindy Joseph
Ketamine seems to be on the rise for use in EMS, even though it has been around since the 1960s. This interactive presentation discusses the benefits of the use of ketamine ranging from agitated delirium to the asthmatic RSI.

SESSION 8*
Cadaver Lab Abdominal Repeat of Session 2
Sue Slone, MD
A visual tour through the abdominal cavity will review the external anatomy and internal structures including the stomach, liver, large and small intestines, and other solid and hollow organs.
NOTE: This session is limited to 25. Space is limited; please register early.

SESSION 9
What I Learned from Spending 8 Weeks in the Hospital or... OB Emergencies
Jenn Oese
Review the required National Registry content for OB assessment and care and providing care to a newborn while also learning about OB emergencies that you may encounter in the field.

SESSION 10
Poly Trauma From MCA, Case Review from PreHospital Care, Level III Care and Definitive Care at the Level I Trauma Center
Steve Morgan, MD
A panel discussion will present a motorcycle accident crash victim with multiple injuries. Discussion will include: the continuum of care from prehospital setting, to initial care at the Level III trauma center, subsequent transfer to the Level I trauma center, and definitive management of the injuries.

SESSION 11
For The Love Of All That Is Holy: Adapting To Your Patients’ Religious Beliefs
Reuben Farnsworth
Muslim women wear hajibs, Jehovah’s Witnesses will not accept blood transfusions, Sikh men wear a turban, and Mormons have special undergarments. Join the discussion and improve your patient care through a better understanding of your patient’s religious beliefs.

SESSION 12
Pediatric Fever-Seizure-Syncope
Timothy Neaderhiser
“98.6 Degrees Fahrenheit”, the number, myth, and hype! This presentation will review the history and relevance of normal body temperature and fever. When should a prehospital provider be concerned? Topics also include fever associated with seizure and differentiating seizure and syncope.

SESSION 13
Dialyze This! A Review of Chronic Kidney Disease
Andrew Higgins
Chronic kidney disease is on the rise across America. EMS agencies frequently respond to dialysis centers and the provider must understand the physiology and complications associated with dialysis. This presentation reviews the pathophysiology and treatment of renal failure.

SESSION 14*
Cadaver Lab Thoracic Repeat of Session 2
Charles Mains, MD
This session will review the anatomy of the thoracic cavity.
NOTE: This session is limited to 25. Space is limited; please register early.

SESSION 15
That’s Freaking Me Out! Assessment and Management of Eye and Orbit Injuries
Don Stroup
This presentation reviews the anatomy of the eye and surrounding structures. Using a combination of case studies and lecture, the assessment, recognition, and proper management of eye injuries will be discussed.

SESSION 16
Electrical Burn Injury: It’s Shocking! One Lineman’s Story of Injury and Recovery
Rebecca Garber
The patient and a coworker will review the circumstances before and after an electrical burn injury. The MedEvac paramedic will then review the pre-hospital care and transport. This presentation will review the pathophysiology and clinical course of electrical burn injury through this case.

SESSION 17
Command and Control at Active Shooter/Hybrid Violence Incidents and Rescue Task Force Concepts
Justin Overholt
When mass violence strikes, conventional incident command tactics do not effectively manage resources and ensure rapid access to patients, and treatment and extraction to safety. This interactive session will review what agencies around Colorado are doing to prepare for these events.

SESSION 18
Hold Still, You’re Going to Feel a Little Poke!
Kevin McFarlane
This session will discuss the complicated task of pediatric venous access. Tips and tricks for starting pediatric IVs will be discussed including pediatric intraosseous access. Broslow tape and other pediatric specialty devices will be reviewed.

FRIDAY / NOVEMBER 3, 2017 - 3:00 PM TO 4:00 PM

SESSION 19
Hands-On Skills Flight for Life Helicopter Safety and All That
Scott Johnson
Flight for Life Colorado will lead this session which begins in the Castle Peaks classroom and ends with a tour of the helicopter in upper SW Tenderfoot parking area (weather permitting). Discussion will involve safe operations in and around the helicopter as well as utilization of air medical resources.

NOTE: This session is limited to 20. Space is limited; please register early.

* Indicates repeated or continued sessions
SESSION 19
You’re Lost Without a MAP
Shane Baird
Historically, management of critical patients in EMS has focused on interpretation of standard vital signs such as pulse and blood pressure. However, to ensure adequate end-organ perfusion, a new standard should be used: mean arterial pressure.

SESSION 20*
Cadaver Lab Thoracic
Repeat of Session 14
Charles Mains, MD
This session will review the anatomy of the thoracic cavity.
NOTE: This session is limited to 25. Space is limited; please register early.

SESSION 21
Marijuana Legalization and Butane Hash Oil Burns: The Dangers Posed to EMS
Arek Wiktor, MD
How has marijuana legalization impacted burn injuries in Colorado and how is butane hash oil manufactured? Videos of BHO scenes emphasize the dangers and why these scenes are especially hazardous for prehospital providers. Tips include how to recognize butane hash oil manufacturing.

SESSION 22
Ranch and Rodeo Injuries
Sue Slone, MD
Several case presentations related to farm, ranch, and rodeo injuries will provide take home messages. These educational points involve both the cause of the injuries, the emergency treatment of the injuries, and safety issues for the provider.

SESSION 23
Apparent Life Threatening Events in Infants (ALTE)
Kevin McFarlane
You may not know the term, but you know the call: 911 is called when a child stops breathing or turns blue. When you arrive the child looks great. Your next actions are critical.

SESSION 24
The Soft Gooey Part: Recognizing Central Nervous System Trauma
Don Stroup
Traumatic brain injury is a leading cause of death and disability in the trauma patient. The prehospital provider with a solid understanding of the physiologic process involved in cerebral perfusion will provide the best possible outcome for these patients.

* Indicates repeated or continued sessions
To determine if a particular conference session meets these requirements, you must first be familiar with the recertification requirements and objectives for your level of certification, then compare the session description to those requirements and objectives. Conference sessions may be approved for continuing education credit by Colorado State recognized Education Centers or CE Education Groups. Please visit the EMS Conference web site at www.emsac.org for information.* Indicates repeated or continued sessions.

Conference sessions may be approved for continuing education credit by Colorado State recognized Education Centers or CE Education Groups. Please visit the EMS Conference web site at www.emsac.org for a detailed grid of recommended CE hours and suggested recertification categories. Most conference sessions will meet recertification requirements for the National Registry of EMTs. To determine if a particular conference session meets these requirements, you must first be familiar with the recertification requirements and objectives for your level of certification, then compare the session description to those requirements and objectives.

* Indicates repeated or continued sessions.

For information about NREMT recertification, please contact NREMT or visit their web site at www.nremt.org.

SESSION 25
How Shocking! Prehospital Evaluation and Management of Lightning Emergencies
Gina Soriya, MD
Colorado is a well-known hot spot for lightning fatalities. Increase your knowledge of the types of lightning and how they result in injury/death. Review the pathophysiology of lightning trauma and the distinct differences in prehospital management of these injuries versus other trauma patients.

SESSION 26
Old Guys Rule! (and take a lot of meds too!)
Jonathan Politis
Looking at a shoebox of meds and trying to sort it all out can be daunting, but those meds are usually the key to their medical history. This session will review some of the most common prescription meds and why your patients may be taking them.

SESSION 27
Trauma Case Studies
Connie Mattera
This presentation uses case scenarios to stimulate discussion underscoring the importance of thorough patient assessments, accurate interpretation of data, the ability to preliminarily rule in or rule out a constellation of injuries, and exercising critical judgment skills.

SESSION 28
The Mile High Club
Kevin McFarlane
You’re on a plane and suddenly you hear a call for anyone with medical training. Do you respond?

SESSION 29
The Prehospital Assessment and Treatment of Anaphylaxis
Paul Werfel
Anaphylaxis is a Greek word meaning “against or opposite.” These exaggerated allergic reactions account for 400-800 deaths per year in the U.S. Topics include: antigen-antibody reaction, immune responses, the lymphatic system, immunoglobulins, and chemical mediators.

SESSION 30
Acute Aortic Syndrome
Patrick Rudersdorf, MD
Acute aortic syndrome (AAS) requires an emergent cardiothoracic surgery consultation. There are many different etiologies of AAS and the presentation may differ. Regardless, once a diagnosis of AAS is made, referral to an appropriate treatment center is paramount.

SESSION 31*
Cadaver Lab Brain Dissection
Kathy Beauchamp, MD
A visual tour through the cranial vault will review the external and internal structures of the skull and brain as well as parts of the spine and other nervous structures. During the session each participant will have a brain to dissect.
NOTE: This session is limited to 25 people. Please register early.

SESSION 32
Forensic Cases In ALS Airway Management
Paul Werfel
We all know that inserting endotracheal tubes or other ALS airway adjuncts is fraught with difficulty, but do we really appreciate the risks? What happens when things go terribly wrong? This session reviews cases studies that highlight issues involved from EMS arrival to court decision/disposition.

SESSION 33
Coroner Scenes and the First Responder
Thomas Weldon
Once a death or fatality is identified on the scene, the actions of the first responders can have a direct impact on the death investigation that follows. This session is designed to educate the first responder on the role of the coroner and the impact they have on the scene.

SESSION 34
Thermal Burns: From Scar Wars to Star Wars
Connie Mattera
Once you have seen, smelled or touched a patient with a critical full thickness burn, you will never forget the experience and you can rapidly and accurately assess the difference between partial and full thickness injury. From scar wars to star wars, research is advancing trauma care of patients.

SESSION 35
Do I Have to Show Them Everything? Colorado Open Records Law
Daniel Hatlestad
Is your EMS agency ready to fulfill the requirements of the Colorado Open Records Act? Colorado’s open record laws permit any person to request information from Colorado government agencies. Colorado’s open records laws apply at every level including towns, cities, counties, and state agencies.

9:45 AM - 11:15 AM
Hands-On Skills
Children’s Hospital ED Physicians
Have you ever wanted to ask a Children’s Hospital ER Physician a question while delivering a patient, but it just wasn’t the right time? Here’s your chance to participate in scenario-based learning, headed by The Children’s Hospital ED physicians, in a fun, relaxed environment. Best practices will be discussed in the management of the acutely sick or injured pediatric patient.

*Indicates repeated or continued sessions
SESSION 36
Little People, Big Problems: Pediatric Emergency Medicine
Case Review
Patrick Mahar, MD
These pediatric cases will touch on the approach to challenging cases that are common and/or interesting medical and trauma presentations.

SESSION 37*
Cadaver Lab Brain Dissection
Repeat of Session 21
Kathy Beauchamp, MD
A visual tour through the cranial vault will review the external and internal structures of the skull and brain as well as parts of the spine and other nervous structures. During the session each participant will have a brain to dissect.
NOTE: This session is limited to 25 people. Please register early.

SESSION 38
Lethal Weapon...Are you Bagging the Life Out of your Patients?
Jonathan Politis
We used to think the basic skill of ventilation was simple and uncomplicated. Come and learn how successful ventilation and oxygenation is deceptively complicated due to impact on blood flow, blood chemistry, cerebral perfusion, and ultimately, patient outcomes.

SESSION 39
Burning Questions in Prehospital Burn Care
Anne Wagner, MD, FACS
This session will cover prehospital presentation including prehospital and acute care of all burn related patients to achieve maximum outcomes in the first 24 hours.

SESSION 40
Safety Patient Mobility - Bariatric Emergencies
Adam Wojciehowski
This presentation will address the common challenges, call types and requirements for pre-planning when treating the morbidly obese patient.

SESSION 41
Post-Intubation Sedation: Insuring Comfort, Safety and Best Outcomes
David Kearns
Once the patient is intubated, the next challenge is to maximize compliance with ventilation while insuring patient comfort and safety. This session will review current research and clinical trials with an emphasis on the application to the unique needs of the prehospital provider.

SESSION 42
Prehospital Pediatric Assessment: A Systematic Approach
Paul Werfel
For most prehospital practitioners, few things create as much anxiety as the emergent pediatric patient. Most of us are quite comfortable with assessing adult patients, but what are the assessment parameters for kids? This presentation will sharpen your assessment skills and demystify this topic.

SESSION 43*
Cadaver Lab Heart Dissection
Scott Branney, MD
Dr. Scott Branney will teach you all about the inner workings of the heart, physiologically speaking. This hands-on dissection lab is guaranteed to be fun and low-stress.
NOTE: This session is limited to 25 people. Please register early.

SESSION 44
Huffin’ and Puffin’: Pulmonary Assessment Essentials
Connie Mattera
It’s our job to figure out if a respiratory problem is caused by a ventilation, diffusion, or perfusion deficit based on a careful assessment of the pulmonary system using inspection, palpation, percussion, and auscultation so we select the right intervention for each patient.

SESSION 45
Medical Case Review
Timothy McCawley
In this session we will examine medical cases to explore if there is anything we can be doing better in the field for our patients. These are cases that may be straightforward - or that will make “you” go “hmm.”

SESSION 46
Zombie Driver...Shift of the Living Dead
Adam Wojciehowski
Fatigue is ranked as a major factor in causing road crashes although its contribution to individual cases is hard to measure and is often not reported as a cause of crash. Driver fatigue is particularly dangerous because one of the symptoms is decreased ability to judge our own level of tiredness.

SESSION 47
Addressing the 7 Dirty Words of EMS Safety
Carl Craigle
It is easy to identify safety issues in EMS, but solutions are not so easy to agree upon and apply in our profession. This interactive presentation will provide participants an opportunity to express opinions or solutions to current EMS safety issues.

* Indicates repeated or continued sessions

Hands-On Skills Children’s Hospital ED Physicians
Have you ever wanted to ask a Children’s Hospital ER Physician a question while delivering a patient, but it just wasn’t the right time? Here’s your chance to participate in scenario-based learning, headed by The Children’s Hospital ED physicians, in a fun, relaxed environment. Best practices will be discussed in the management of the acutely sick or injured pediatric patient.
SESSION 48
Mobilizing, Mechanically Ventilating and Medicating the Morbidly Obese Patient
Justin McLean, MD
Morbidly obese patients present specific challenges when transporting the critically ill. This session will review critical care transport issues, such as ventilating the intubated morbidly obese patient and medication adjustments that may be needed.

SESSION 49*
Cadaver Lab Heart Dissection Repeat of Session 43
Scott Branney, MD
Dr. Scott Branney will teach you all about the inner workings of the heart, physiologically speaking. This hands-on dissection lab is guaranteed to be fun and low-stress.
NOTE: This session is limited to 25 people. Please register early.

SESSION 50
Bloody Sewage... Sepsis Awareness for the EMT
Jonathan Politis
Sepsis is a major cause of death in the U.S. This presentation will explain the evolution and effects of an infection in the bloodstream and how it causes septic shock. Concepts of SIRS, sepsis and septic shock will be covered along with early recognition and management of sepsis.

SESSION 51
Trauma Case Reviews
Timothy McCawley
These interesting trauma cases will keep you on your toes. Some participants have said ‘they can’t prepare you for that in Paramedic school’. These scenarios may be like a game of “Clue” with the twist and turns, but in the end we will learn more trauma management.

SESSION 52
Excited Delirium – a True Medical Emergency; Not a Crime
Adam Wojciehowski
A screaming, agitated individual standing in traffic required only police response. When forced to calm the subject, injuries occurred and EMS responded at the request of the police. Treatment focused upon clearing them for incarceration. This scenario often resulted in death of the subject.

SESSION 53
What Can You Do After You Say You’re Sorry
Marti Potter
When someone experiences a loss we may say “I am sorry for your loss.” But then what? This presentation offers ideas for interventions that can assist others in dealing with loss. We will also discuss ways to assist healthcare workers who experience work-related stress from the loss of others.

SESSION 54
Pragmatic 12 Lead EKGs
William Ferguson, MD
Pragmatic EKG interpretation will review practical application of current trends in therapy for both the beginner and experienced ACLS provider. The most common pathophysiology of dysrhythmias along with critical, life threatening mimics in a practical, easily useable format will be presented.

SESSION 55
The Role of EMS in Firefighter Rehab: Structural and Wildland
Daniel Hatlestad
Stress-related health issues account for many of the leading causes of firefighter injury and death. EMS clinicians must rapidly identify the need for rehabilitation on both structural and wildland fires, implement a systematic assessment and identify firefighters in need of additional care.

SESSION 56
Tourniquets: Myths and Misconceptions in the Art of Field Hemorrhage Control
James Yon, MD
Misconceptions or outdated data can lead to improper use of tourniquets. In this session, tourniquet types will be reviewed, proper use discussed, and many of the controversies in tourniquet use will be addressed.

SESSION 57
Don’t Show Me the Money: Effectively Incentivizing Volunteers
Nancy Magee
Join Nancy Magee as she examines what truly motivates EMS volunteers and how to encourage and embrace those motivations at your agency.

SESSION 58
Working Relationships with Your Medical Director
Timothy McCawley
Looking for a new Medical Director or do you have a new Medical Director? How do you build a relationship to better your organization? In this session we discuss how to build a relationship with your Medical Director from both the provider and the administrator levels.

AWARDS RECEPTION/PRESENTATION
Join your colleagues as we recognize those who have performed outstanding service to their communities. Visit emsac.org/awards for information.

3:45 PM - 4:45 PM
Hands-On Skills
HealthOne EMS
High-definition simulation equipment will be utilized to provide scenario-based/real-time training in this skills lab. The goal will be to provide the participant with exposure to high-acuity, low volume scenarios to improve his/her comfort level in treating difficult patient presentations.

*This session is limited to 20 people. Please register early.

* Indicates repeated or continued sessions
SESSION 59
Introduction to Portable Ventilators
Carl Craigle
Aside from the critical care transport environment, should the use of portable ventilators become a standard of care in the 911 setting? This presentation will introduce BLS & ALS professionals to the basic principles of setting up a vent in the field.

SESSION 60
Street Care of Thoracic Trauma
Michele Sweeney, MD
Learn and review best practices in recognizing and treating acute life-threatening trauma to the thoracic organs.

SESSION 61
Diabetic Emergencies: “Not Just Highs and Lows”
William Ferguson, MD
The session will discuss current trends in outpatient management of diabetes that can impact patient encounters and will include more than hypoglycemia and hyperglycemia. Pearls of how to identify diabetic emergencies and discuss the appropriate course of treatment will be provided.

SESSION 62
Competence Breeds Confidence: Keeping Your Low Volume EMS Volunteers Engaged and Ready to Respond
Nancy Magee
This presentation will explore strategies to keep your skills sharp and your confidence high even if you’re not running calls. Topics include how to K.I.S.S your ambulance and SWOT your staff by simplifying your equipment and utilizing cognitive off-loading.

SESSION 63
Colorado EMS and Trauma: State of the State
Jeanne-Marie Bakehouse
Hear from the State EMRS office about policy initiatives and rule revisions for Colorado's EMS and Trauma system, and how these changes affect certified EMS providers, licensed air ambulance agencies, designated trauma centers, and recognized education programs.

SESSION 64
Breathe Easy: The Physiology of Hypoxia
Michael Overbeck, MD
Providers on the front lines encounter hypoxia in patients regularly. This session will review the processes that underlie hypoxia like deadspace, shunting and pulmonary edema, and review techniques to address hypoxia including deadspace ventilation, apneic oxygenation, and positive pressure.

SESSION 65
Making Emergency Vehicles Safer by Examining the Human Factors and Mindset of Vehicle Operators
Timothy Zimmerman
We all seek the safer ambulance design. Until we answer the question “Why do we drive emergency vehicles the way we do?” we will struggle to find the safe ambulance. Could the answer to the safer ambulance be found in human factors involved in the operation of the emergency vehicle?

SESSION 66
Case Reviews for the ALS Provider - 2017
David Sanko
A generous mix of medical and trauma cases will test even the most experienced provider. The patient’s presentation from the EMS perspective will be followed through the hospital course. Compare your treatment plan to what actually transpired.

SESSION 67
Everything We Know About Recruiting & Retaining EMS Volunteers
Nancy Magee
Ask any volunteer agency administrator and their greatest challenge is recruitment and retention of quality personnel. Volunteer agencies around the country are struggling to staff ambulances and many are closing their doors. This class explores the reasons your agency struggles to keep personnel.

SESSION 68
Developing a Just Culture for Our Teammates (To Err is Human - But Where do You Draw the Line?)
Carl Craigle
EMS providers are expected to think around corners and make difficult decisions under pressure. Even though we work in a high stakes environment and serious consequences can be looming, human beings make mistakes. Should we console, coach or punish our people when bad things happen?

* Indicates repeated or continued sessions
REGISTRATION FORM

Please print or type all information below. One registrant per form; this form may be photocopied for additional registrations. Registrations will not be accepted without accompanying payment. Facility purchase order may be accepted as payment guarantee and full payment must be received prior to the conference. If payment has not been received, participants will be asked to provide payment information prior to picking up their packet. Register online at emsac.org to assure you receive your preferred classes.

REGISTRANT INFORMATION
Please print legibly or type. This information will appear on your name badge and other conference materials.
First Name__________________________________________ Last Name__________________________________________

EMS Provider Level:  q First Responder  q EMT  q AEMT  q EMT-I  q Paramedic  q Nurse  q Physician  q Other:

EMSA MEMBERSHIP

q Check here to join EMSAC for $40 for an individual membership and receive the member rate for an individual registration.

We offer a discounted squad rate for EMSAC Group Members only. Please note: In order to receive the member rate your membership must be active through the end of November. Squad registrations may be processed through the online registration system. A list of all individuals that will be submitting registrations through your squad MUST be sent to the conference office (Fax 303-200-7099 or email Conference@emsac.org) as well as a contact name, address and phone number. Please note if your squad does not reach the minimum number required for Squad Registration you will be billed the difference.

SQUAD REGISTRATION - FOR EMSAC GROUP MEMBERS ONLY

Your squad may register one-at-a-time. We just ask that a list of everyone attending under this rate be sent to the office prior to registering.
